Brown Bag Seminar

Topic: Virtually, Solaris

Speaker: Jason Schroeder

Jason Schroeder is a Systems Engineer and OS Ambassador with Sun Microsystems. He often speaks on technology adoption, roadmaps and development relating to OpenSolaris projects across the country.

Date: Tuesday, March 25th

Time: 3:00 pm

Place: Manchester 024

From Xen to Zones to VirtualBox, technologies supporting the virtualization of compute resources alter the editorial view of what constitutes an operating system platform. This technical discussion and demonstration will highlight various integration points, underlying infrastructure and future projects enhancing Solaris and OpenSolaris' role in delivering virtualized environments. A specific focus on hypervisor and Zone delivery in relation to core Solaris features such as ZFS, Crossbow, resource management and Trusted Extensions will be discussed.
